During World War II, Truk Lagoon was the Japan's main naval base in the South Pacific theatre. In 1944 the U.S. forces attacked Chuuk Island and the Lagoon under code name Operation Hailstone. The attack culminated in one of the most important naval battles of the war. Twelve Japanese warships, thirty-two merchant ships and 249 aircraft were destroyed.

The most famous wreck diving destination is right out our backdoor on this luxury liveaboard. A full week of diving can be done in recreational diving range, but deeper sections on the same dive sites can be accessed by tech divers.

Some wrecks are hundreds of feet long, demanding multiple dives. Tanks, naval guns, torpedoes, bulldozers, planes; it is all there – a wreck diving mecca. A must dive, bucket list location for any diver!
